PREFACE

1988 Public Library Statistics

This publication is our third annual effort to provide Washington public librarians and board members with statistics and input-output measures which they may find useful for planning, budgeting, and public relations.

This edition of Washington Libraries: Public Library Statistics includes two new charts. Table 14 includes information on the roles which those libraries which have participated in planning have selected. In addition, Table 15 includes statistics provided for additional output measures. It is obvious that many libraries have not begun to collect this information. Appropriately, others have collected statistics on only those measures appropriate to their chosen roles. Each year, more information is provided by Washington's public libraries, and although there are more "NR" notations than figures on the charts now, the number of figures provided is increasing.

The information included in this publication is available on floppy disk; please send a preformatted diskette to Library Planning and Development, Washington State Library AJ-11, Olympia, WA 98504-0111 and we will copy the file onto your disk and return it to you.

Jan Walsh, Chief Consultant
Jan Solt, Administrative Assistant

INTRODUCTION

Washington Libraries: Public Library Statistics reflects both input and output measures. At the end of each service population range, i.e. over 100,000; 25,001-100,000; 5,001-25,000; and 5,000 and under, totals and Washington's average statistics are provided.

In using the measures included in this publication, it is important to remember that performance measures are not absolutes. There are no right or wrong statistics and performance measures are not precision measures. Most are calculated in percentages and express ratios. Furthermore, performance measures should be used in context.

An individual library's measurements should be analyzed in terms of that library's roles, goals, objectives, services and financial resources. Statistics, particularly those related to output measures, should be used for internal management of the library rather than for comparison with other libraries. When libraries determine their roles, the measures which relate to those roles will be significant to them. The roles of public libraries differ; therefore their pertinent measurement needs differ. Across the board comparative statistical analysis is not valid if the libraries being compared have chosen different roles.

Be creative in thinking about how the information supplied by these measures can help you improve library services; use them to analyze your services and to work with your local government and your public. No single performance measure tells a complete story. Interpret your performance measures in context with other types of measures for your library and with the library's overall roles, services and budget. Additional information may be found in the two 1987 publications of the American Library Association, Planning and Role Setting for Public Libraries and Output Measures for Public Libraries.

This section is designed to explain the input and output measures included in this publication. It cites the measure's definition; how the figure is calculated; the relation of the measure to other measures; factors that influence the measure; roles to which the measures are pertinent; and some useful means of increasing or decreasing a statistic.

INPUT MEASURES

These measures reflect statistics that are the direct result of resources that have been put into the library. This is usually revenue, but may also take into consideration the other resources of the library -- staff, collection and facilities.

Operating Expenditures Per Capita

(Table 4) Operating expenditures per capita relates the total amount of library funds spent for operating purposes to the number of persons the library is established to serve. It is the dollar amount spent on staff, materials, and other operating expenses divided by the population of the library's legal service area.

This figure approximates the average cost per resident of running the library and may be relevant whenever the economy or efficiency of the library's overall operation is addressed.

The cost-effectiveness of library operations may be demonstrated by relating operating expenditures per capita to the output measures which best reflect the range of most frequently used services and programs, as well as the identified roles of the library. Cost-effectiveness with statistics is best done by one library over a period of time or by comparison of two libraries which are similar in size and roles. One can further analyze library expenditures by calculating this measure for budgetary breakouts and by calculating expenditures per registered borrower.

Expenditures per capita reflect the community's financial support in relation to its size. It can provide important information for elected officials and the general public as they review the budget for the library. Have the expenditures per capita remained relatively constant while service measures such as circulation per capita have increased? If so, the library has increased the efficiency of its services. However, in a service area which is growing rapidly while the library budget remains static, expenditures per capita and performance measures such as holdings per capita may fall. This indicates that there is a strain on the library's collection and additional funds are needed.

Factors that influence this measure include: economic conditions; changing tax base; demands on local government for all public services in general and library service specifically; community perception of the importance and value of library services, including both residents and elected officials; political climate; the extent to which central services such as custodial, utility and administrative functions are charged to the library's budget. Projects to increase operating expenditures per capita include, but are not limited to: working for increased financial support; conducting a public relations campaign to convey the usefulness, value and importance of good library services; emphasizing the provision of services the community needs and wants the most; becoming politically aware and active; and improving library budgeting skills.

Personnel Expenditures Per Capita

(Table 6) Personnel expenditures per capita relates the amount of funding spent on staff to the number of persons the library is established to serve. It is the dollar amount paid in salaries, wages and benefits divided by the population of the library's legal service area.

The figure indicates the average cost per resident of staffing a library.

This input measure can be relevant whenever the adequacy of library staffing or performance are addressed. The cost-effectiveness of library services may be demonstrated by relating personnel expenditures per capita to output measures which indicate the amount of service delivered, i.e. circulation per capita, reference transactions per capita, and program attendance per capita.

Other Operating Expenditures Per Capita

(Table 6) This measure relates the amount of funds spent for purposes other than staff and materials to the number of persons the library is established to serve. It is the dollar amount spent on miscellaneous operating expenses, including but not limited to, office supplies, telephone and utilities, divided by the population of the library's legal service area.

This figure approximates the average cost per resident of running library facilities and other miscellaneous operations.

This input measure may be relevant whenever the economy or efficiency of the library's day to day operations are addressed. The cost-effectiveness of library operations may be demonstrated by relating this measure to the output measures which best demonstrate the range of most frequently used services and the roles of the library.

Collection Expenditures Per Capita

(Table 7) This measure relates the amount of funds which the library spent on materials for the collection, both print and nonprint, to the population of the legal service area. It is the dollar amount spent on materials for the collection divided by the population of the library's legal service area.

This figure indicates the average cost per resident of purchasing, but not processing, newly acquired materials.

Collection expenditures per capita is useful whenever the size or usefulness of the collection is addressed. When using this measure to address such issues, it may be helpful to relate it to holdings per capita and to output measures which indicate the usefulness of the materials, such as turnover rate, circulation per capita, ILL net lending rate and ILL's per 1,000 circulation. Further analysis of collection expenditures per capita can be made by type of material.

Service Population Per Staff

(Table 9) This measure relates the population of the legal service area to the number of full-time equivalent (FTE) staff. Full-time means 40 hours per week, regardless of how many hours the library is open per week. It is the number of persons in the library's legal service area divided by the number of library staff in FTE's. To complete full-time equivalents or FTE of employees who work fewer than 40 hours per week, take the total number of hours worked by both full-time and "less than 40 hour a week staff" divide it by 40.

Service population per staff indicates the average number of residents each staff member might serve annually if all residents used the library.

This measure may be important whenever the adequacy of library staffing and staff funding are addressed. An argument can be made that there should be a corresponding increase in staff to offset any population increase.

Holdings Per Capita

(Table 10) This measure relates the number of items the library owns to the number of persons it was established to serve. It is the number of items in the collection divided by the population of the library's legal service area.

It is a rough measure of the extensiveness of the library's holdings compared to the population, indicating the average number of items held for each person in the library's legal service area.

This measure may be relevant whenever the size of the library's collection is addressed. Factors which influence this measure include: size of the collection; increase or decrease in community size; size of the materials budget; library collection and weeding policies; and how the library defines its holdings. It is important to note that this measure must be interpreted in connection with other measures, since collection size alone is not necessarily an indicator of quality. Turnover rate and circulation per capita can be useful in interpreting this measure.

One can further analyze the library's collection by calculating the following:

* Holdings per capita rates separately by type of material
* Holdings per capita rates separately for adult and juvenile materials
* Holdings per capita rates separately for various classifications within the Dewey Decimal system
* Holdings per capita for special classes of materials for certain users -- large print for the elderly, easy books for toddlers.

OUTPUT MEASURES

Output measures indicate results and outcomes, measuring the effectiveness and the extensiveness of the services provided by the library. This is the ratio of what is produced to how many it is produced for.

Registration as a Percentage of the Population

(Table 9) This measure relates the number of persons registered as borrowers to the number of persons the library is established to serve. It is the number of registrations divided by the population of the library's legal service area.

This measure indicates the percentage of the library's potential users who have registered to borrow materials.

Registration as a percentage of the population may be relevant whenever public awareness of the library is addressed. This measure indicates the percentage of potential users who know the library exists and, by registering, have implied an intent to use it. Low registration per capita may indicate a need to increase public relations, to evaluate the usefulness of the collection to potential patrons, and to evaluate overall services. High registration per capita may be useful in justifying increases in input measures such as personnel, collection and/or other operating expenditures per capita. Further analysis using registration per capita can be made using type or age of borrower.

Those libraries which have Popular Materials Center as one of their roles should strive for a high registration as a percentage of the population measure.

Circulation Per Capita

(Table 11) This measure compares the number of items the library circulates to the population of the legal service area. It is the number of loans divided by the population of the library's legal service area.

Circulation per capita represents the average number of items checked out to each resident annually.

Factors which may influence this measure include: increase or decrease in the service area's population; increase or decrease in the annual circulation; circulation policies, such as length of loan period; library's hours of service; number of library users; special programs; age, breadth and condition of the library's collection; number of non-circulating items; community awareness of the library; library acquisitions policies; and physical arrangement, convenience and location of the library.

Circulation per capita is one measure of the community's use of the library. If the library's roles include either Popular Materials Center or Preschoolers' Door to Learning, a high circulation per capita is a measure of its success. A high circulation per capita indicates heavy use of the library's materials and may indicate a need to increase collection expenditures per capita. A low figure may indicate that the library's collection might not meet the needs or interests of the community or that residents may not be aware of the library's resources. On the other hand, it could mean that the library has a high number of non-circulating materials. This could be confirmed if the library has a high library attendance per capita, a high in-library use per capita, and/or a high reference transaction measure per capita.

To increase this score, library staff might encourage borrowing by infrequent users and nonusers. They might initiate a public awareness campaign and outreach services, increase access to library service by changing hours or by making circulation policies less restrictive, reconsider the acquisitions policy, weed the collection to remove obsolete and worn materials, rearrange the library to improve traffic flow, add directional signs and finding aids, or any combination of these strategies. Lower circulation per capita is likely to be related to lower collection expenditures and holdings per capita. It may lead to more interlibrary loans per 1,000 circulation.

One can further analyze the library collection's use patterns by determining any of the following:

* Circulation per capita rates separately for adults and juveniles
* Circulation per FTE staff member as a workload measure
* Circulation per registered borrower
* Percentage of circulation by non-resident users
* Circulation per capita separately for various kinds of materials.

Turnover Rate

(Table 11) Turnover rate relates the number of loans of library materials to the size of the collection. It is the number of loans divided by the number of items held in the collection at the end of the year. It measures the activity of the library's collection, indicating the number of times each unit of library material would have circulated during the year if circulation had been spread evenly throughout the collection. This output measure may be relevant whenever use of the collection is an issue. It may be useful to compare this figure to selected inputs such as holdings per capita and outputs such as circulation per capita and interlibrary loans per 1,000 circulation.

Factors which influence this measure include:

* Increase or decrease in annual circulation
* Circulation policies, including loan period and fines
* Special programs, e.g. summer reading program
* Library hours of service
* Library acquisitions and collection development policies
* Community awareness of the library
* Condition, age and breadth of the library's collection
* Physical arrangement and location of the library.

This measure relates strongly to the goals the library has set for meeting the needs and desires of the community. A library which emphasizes the circulation of popular reading materials, having selected Popular Materials Center as one of its roles, will have a higher turnover rate than a library which emphasizes subject breadth in the collection, perhaps as an independent learning center, or a library which has an extensive reference collection. If the library has placed a priority on high circulation, it will want to increase its turnover rate. The implication is that replacement of materials will help to increase the turnover rate. Staff may wish to assess the needs of library users and nonusers and purchase new materials based on that assessment. They might consider purchasing duplicate copies of popular works, attempting to get new books on the shelf faster, removing seldom used materials from the collection, or increasing the number of hours the library is open. Other possible solutions are to make circulation policies less restrictive, conduct a public relations campaign, increase or modify library service hours, rearrange the library and/or use merchandising techniques to promote library materials.

Possibilities for further analysis include calculating turnover rates for the following: various subject classes of materials; different formats of holdings, i.e. video, periodicals, books; adult and juvenile materials.

ILL Net Lending Rate

(Table 11) This measure relates the number of materials provided to other libraries through interlibrary loan (ILL) to the number of materials borrowed from other libraries through interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

ILL net lending rate indicates items loaned as a percentage of items borrowed.

This output measure may be relevant whenever the nature of the library's participation in interlibrary loan activities is addressed. It indicates whether the library does more lending (scoring over 1.0) or more borrowing (scoring less than 1.0).

Net borrowers may use this figure as evidence of what they gain from participation in ILL activities or, in conjunction with collection expenditures per capita, argue for increased financial support for the local collection. Net lenders may use the statistic to argue that the strengths of their collections need to be maintained because the collection is used by a larger population and is of value to other citizens in the state.

ILL's Per 1,000 Circulation

(Table 11) Interlibrary loans per 1,000 circulation relates the number of materials borrowed from other libraries to the number of materials from the local collection made available to borrowers. It is the number of ILL requests divided by total circulation multiplied by 1,000.

This output measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.

Higher ILL's per 1,000 circulation might indicate better performance by the library as an access point for information not contained in the local collection. On the other hand, lower figures might indicate that the local collection was doing a better job of meeting user needs. The interpretation to make of this measure would depend on the issue at hand as well as the actual amount of ILL and circulation activity per capita. Postage and courier delivery activity would also be factors to consider in interpreting this measure. Is a large amount of postage for interlibrary loan justified or should the funds be allocated for expenditures for a collection which better meets the needs of local library users?

Program Attendance Per Capita

(Table 12) This measure relates attendance at scheduled presentations which are sponsored by the library and deal with information services (including story hours), on or off the premises, to the number of persons the library is established to serve. It is program attendance divided by the population of the library's legal service area.

This measure indicates the percentage of residents of the library's legal service area who attended a library program during the year.

Program attendance per capita may be relevant whenever the library needs to demonstrate its services to groups, in contrast to services to individuals, such as circulation and reference. If a library has chosen either Community Activity Center or Community Information Center roles, it will strive for a high program attendance per capita.

Library Attendance Per Capita

(Table 13) Library attendance per capita relates the number of visits made to the library to the population of the library's legal service area. It is attendance at the library during a typical week multiplied by 50 (the average number of weeks a public library is open during the year) divided by the population of the library's legal service area. Attendance per typical week may be estimated by counting the number of persons who enter the library during a typical week (one during which the library is open its regular hours with no holidays and which is neither very busy nor very slow).

This measure indicates the average number of library visits per person in the service area yearly.

To measure public awareness of the library, library attendance per capita is a better measure than registration per capita. Registration statistics may be out-of-date and, as a result, perhaps invalid, while attendance statistics reflect actual visits to the library. Taken with in-library use, reference, circulation and program attendance per capita, library attendance per capita can be used to develop an accurate annual profile of library use.

In addition, telephone use per capita and mail use per capita are also valid measures in determining use of the library's services.

A library will want a high library attendance per capita if it has chosen either Community Activities Center or Community Information Center roles.

In-Library Use Per Capita

(Table 13) This measure relates the number of materials used in the library, but not checked out, to the number of persons the library is established to serve. It is in-library use per typical week multiplied by 50 (the average number of weeks a public library is open per year) divided by the population of the library's legal service area. In-library use per typical week may be determined by counting the number of items to be reshelved or refiled during a typical week.

This measure indicates the average number of items used in the library, but not checked out, per resident of the library's legal service area in one year.

In-library use per capita may be relevant whenever evidence of library use is required. Use of circulation per capita and in-library use per capita as well as telephone use per capita will measure the extent that residents turn to the library as a source of useful information.

A public library will want a high in-library use per capita measure if it has chosen any of the following roles: Formal Education Support Center; Independent Learning Center; Reference Library; or Research Center.

Reference Transactions Per Capita

(Table 13) This measure relates the number of information contacts which involve the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a staff member to the population of the library's legal service area. This does not include directional assistance. It is the number of reference transactions per typical week multiplied by 50 (the average number of weeks a public library is open in a year) divided by the population of the library's legal service area.

This measure indicates the average number of times a year that a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library.

Reference per capita may be relevant whenever the impact of reference service is addressed. Reference questions answered by phone may be included. Comparing this figure to circulation and in-library use per capita may be useful assessing the reference desk as an access point for information available in the local collection. Comparison to ILL's per 1,000 circulation and ILL net lending rate may be useful in assessing access via the reference desk to information that is not available locally. Reference transactions per capita may also have staffing and training implications.

If a library has chosen the role of either Community Information Center or Reference Library, it will attempt to have a high measure in reference transactions per capita.

Reference Completion Rate

(Table 15) This measure is the proportion of reference transactions successfully completed, in the judgment of the librarian. The number of reference transactions completed is divided by the number of reference transactions.

Reference completion rate is relevant whenever the impact of reference service is addressed and it is limited to the librarian's estimate of the completion rates.

Title Fill Rate

(Table 15) The Title Fill Rate measure is the proportion of specific titles sought that were found during the user's visit. It is the number of titles found divided by the number of titles sought. A Materials Availability Survey of users is the method used to collect the data.

It is important that this measure be looked at with Materials Use Measures, i.e. turnover rate and circulation per capita. The fill rate indicates how successful the users are, but it does not show whether the library is used.

Subject and Author Fill Rates

(Table 15) This measure indicates the percentage of requests for materials on a given subject or by a specific author found at the time of the request. It is the number of subjects and authors found divided by the number of subjects and authors sought.

Browsers' Fill Rate

(Table 15) This is the percentage of users looking for something interesting, rather than a specific author, title or subject, who were successful in their searches. It is the number of browsers finding something divided by the number of browsers.

Document Delivery Within 7 Days, Within 14 Days, and Within 30 Days

(Table 15) The Document Delivery measures are the percent of requested materials available within 7, 14, and 30 days. It measures the number of days required to get to users those materials not available at the time of their visits, either because the library does not own them or because they were already circulating.

PUBLIC LIBRARY ROLE DESCRIPTIONS

The Public Library Association has developed the following eight sample roles to assist local libraries in organizing services to meet local needs.

Community Activities Center

The library is a center for community activities, meetings, and services; it works with other community agencies and organizations to provide a coordinated program of social, cultural, and recreational services. It has meeting room space and equipment for community or library sponsored programs. Programs might include book talks, health information fairs, book discussion groups, community issues forums, speaker series, concerts, art exhibits or humanities programs.

Community Information Center

The library serves as a clearinghouse for current information on community organizations, issues, and services and maintains a high profile as a source of information about community services. The library may maintain files of local organizations and service agencies, index local newspapers, participate in community referral networks, maintain and publicize a master calendar of community events and participate with other agencies in planning programming or information fairs on community issues.

Formal Education Support Center

The library assists students of all ages in meeting educational objectives established during their formal courses of study. It offers tours for classes, instructs students on using library tools and may sponsor a homework service. The library may reserve special materials to meet classroom assignment needs and may support a literacy program. Libraries emphasizing this role may specify the educational levels supported.

Independent Learning Center

The library supports individuals of all ages who set their own learning objectives to meet such concerns as citizen education, self-improvement, job-related development, hobbies, and cultural interests. The staff help learners identify an appropriate learning path, determine needed resources, and obtain those resources from the library's collection or through interlibrary loan. Staff involvement with individual learners is a distinguishing characteristic of this role.

Popular Materials Center

The library features current, high demand, high interest materials in a variety of formats for persons of all ages. The library actively promotes and encourages the use of its collection. Merchandising techniques may be used within the library and booklists may be distributed or materials gathered together to encourage circulation in connection with a library program, such as a children's story hour, summer reading program or young adult program. The library may circulate materials at off-site outlets, such as shopping malls, jails, nursing homes, etc.

Preschooler's Door to Learning

The library encourages young children to develop an interest in reading and learning through services for children, and for parents and children together. Adults can find materials on reading readiness, parenting, child care, and child development. The library promotes readiness from infancy, providing services for self-enrichment and for discovering the pleasures of reading and learning.

Reference Library

The library actively provides timely, accurate, and useful information for community residents in their pursuit of job-related and personal interests. The library participates in interlibrary loan and cooperative reference services to meet patrons' needs for information not available locally.

Research Center

The library assists scholars and researchers to conduct in-depth studies and investigate specific areas of knowledge. The library's collection is a source of exhaustive information in selected subject areas. A library choosing this role should specify the subject disciplines in which it intends to be a Research Center.

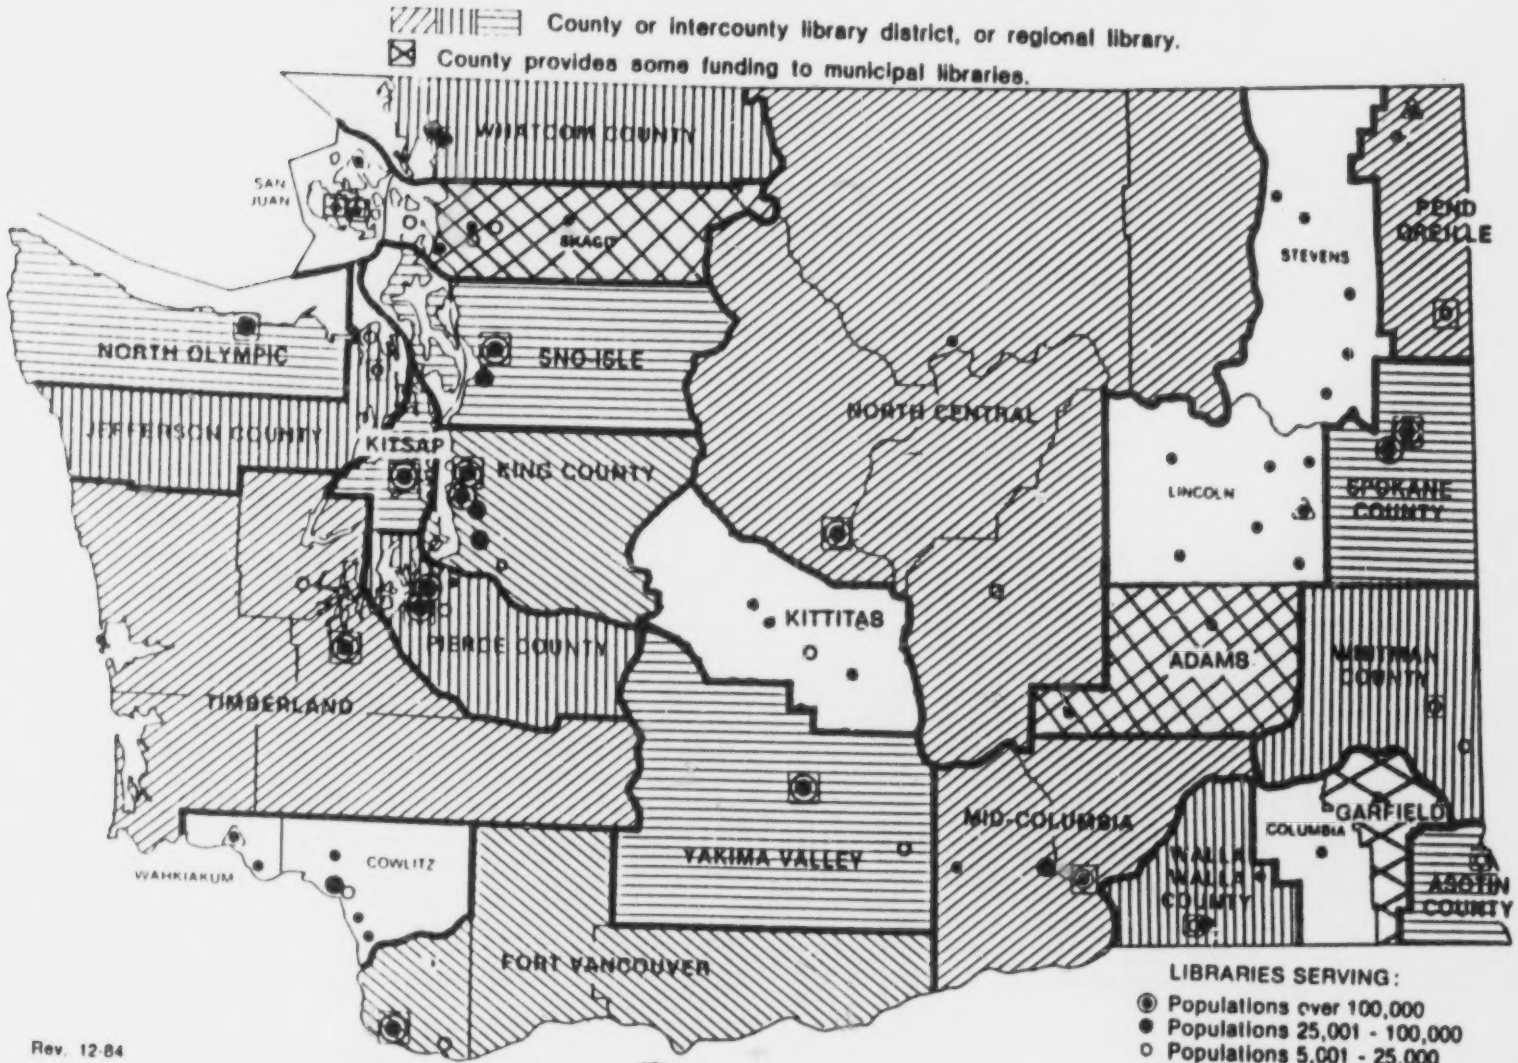
PUBLIC LIBRARY SERVICE PATTERN IN WASHINGTON STATE



Rev. 12-84

PUBLIC LIBRARY SUMMARY OF SERVICE

TOTAL STATE POPULATION 4,565,000 -a-

	Population -a-	Number of Libraries	Percent of State Population
LIBRARIES ACCORDING TO SIZE OF POPULATION SERVED:			
Over 100,000	3,768,607	13	82.55%
25,000 - 100,000	387,290	9	8.48%
5,001 - 25,000	199,668	17	4.37%
5,000 and under	62,455	31	1.37%
TOTALS	4,418,020	70	96.78%
LIBRARIES ACCORDING TO OPERATIONAL INCOME:			
$ 0 - 10,000	10,881	12	0.24%
$ 10,001 - 25,000	13,655	8	0.30%
$ 25,001 - 50,000	4,605	2	0.10%
$ 50,001 - 100,000	35,044	9	0.77%
$ 100,000 - 200,000	68,650	8	1.50%
$ 200,001 - 500,000	185,518	11	4.06%
$ 500,001 - 1,000,000	96,640	3	2.12%
$1,000,000 - 5,000,000	2,501,907	14	54.81%
$5,000,000 - 15,000,000	657,300	2	14.40%
Over $15,000,000	843,820	1	18.48%
TOTALS	4,418,020	70	96.78%

LIBRARIES ACCORDING TO TYPE OF ORGAIZATION/ OPERATIONAL EXPENDITURES:

	Amount Exp.				Expenditures Per Capita
Library Districts -b-	48,073,998	3,135,965	20	68.70%	$15.33
Municipal Libraries	33,159,381	1,282,055	50	28.08%	$25.86
TOTALS	81,233,379	4,418,020	70	96.78%	$18.39

UNSERVED AREAS:

Counties With No Library District	117,254 c	9	2.57%
Municipalities Without Public Library Service	29,726	45	0.65%
	146,980		3.22%

a Population figures based on Office of Financial Mangement document: Population Trends of Washington State, August, 1988.
b Unincorporated areas and annexed and contracting municipalities.
c Excludes municipalities with library service.
